Order Count

Average Order Value

Conversion is sharply defined by the cart→purchase stage, which varies significantly across traffic sources. **For further details, check the funnel page.**

Higher tiers contribute higher average revenue, but the effect becomes weak after the Gold tier.

Cart Abandonment Rate

63.7%

Traffic Source	View to Click	Click to Cart	Cart to Purchase
Email	36.3%	75.0%	65.1%
Paid Search	36.6%	74.0%	61.7%
Social	36.1%	75.2%	52.5%
Direct	36.2%	75.3%	14.3%
Organic	36.3%	75.4%	14.2%

The gap is in the checkout stage, varying significantly by channel. Organic is particularly leaky as it brings the most traffic but presently fails to convert much of this potential.

Test group B sees improvements in precisely the leaky cart to purchase stage.
